## ORE BODY EXPOSED IN THE IVANHOE SHAFT; SENSATION

(Special to The Republican) OATMAN, June 24.—The latest sensation in the district was the opening of the vein on the Ivanhoe at a depth of 500 feet. The foot wall of the main vein was entered Wednesday night and after a round of shots the ore body was exposed.

The ore was mostly quartz and a mixture of calcite. The company has not made an assay public, as yet. An announcement comes this week of the closing of a deal by E. McNeil and company of Chicago which means the complete financing of the Black Range Mining company. The deal was closed by Mitchell Carter manager of the Oatman Investment company following the arrival here of George R. Turley, junior member of the Chicago firm who with his engineer Charles Arkins of Chicago made a thorough examination of the property.

Plans are now under way for the sinking of a three compartment on the Black Range shaft which will be sunk to a depth of 600 feet. This shaft will be sunk 200 feet west of the present shaft.

The Oatman Gold Monster Mining company has been launched. W. L. Wilson, head of the W. L. Wilson company of Los Angeles is operating this property. Associated with Mr. Wilson are Frank and Otto Busch, Mel Nordlinger, J. J. and Jack Jeffries, Charles Wellington Rand, W. L. Bernard, Robert Gollmer, William Bule, Bruce Boyd, Frank Carroll, Dr. William Dodge and Al Brown.

C. H. James, the noted English mining engineer is now making a report on this property which is located in the heart of the activity in the Black Range section.

The property is now being surveyed and plans are being made to start active development. The Big Jim has installed the new turbine pump and intense activity now prevails on that property.

The company is driving on four faces at once and three shifts are working with all possible speed, blocking out the ore on the 400 and 485 foot level.

Rapid progress is being made on the Arizona Central. The shaft is down to a depth of 120 feet. The company is using a small hoist and working with hand steel, pending the arrival of the machinery which was ordered some time ago.

The Arizona Central adjoins the United Eastern and the Blue Bird. The treasury is in a strong position to carry out extensive development. The Mohawk Central has just cut a stringer at a depth of 75 feet. This stringer is 14 inches wide and a systematic sample secured from it showed gold values at \$4.55 per ton. Operations are progressing steadily.

The Blue Bird has started cross cutting the vein on the 200 foot level. Sinking was stopped due to the fact that considerable water was struck at the 250 foot level. Cross cutting will be continued while the new machinery is being installed.

Plans are under way for the installation and erection of the machinery on the Liberty Bell which is located in the Pioneer section of the camp south of the recent strike of the Oatman Pioneer. Lumber for the improvements which included bunk house, engine house, blacksmith shop etc., has arrived. The shaft is down to a depth of 150 feet and with the installation of the machinery work will take on a new aspect. A. E. Bird and W. A. Penrod of Santa Ana arrived here during the week and will have charge of the operations on the property.

Development work on the Oatman Empire is well under way. This property which is located in the north-west section of the camp takes in 20 claims and is operated by a number of eastern capitalists, headed by John E. Cockrum, the general attorney for the New York Central R. R. company.

Work is being extended on the 500 foot level of the Gold Dust under the management of F. E. Brush. The company is making every effort to explore the ore body with the greatest possible speed. The Gold Dust is one of the oldest properties in the district.

The Oatman United is now installing the new machinery. The hoist and lighting engine has arrived and is being put in place. Charles S. Sprague, president of the company and J. K. Turner consulting engineer are on their way to Oatman from Gold Field.

E. W. Brooks of Los Angeles, the noted mining engineer has just completed a highly favorable report on the Oatman Bell, operated by Lester M. Duil of Los Angeles and associates.

Penrod of Santa Ana arrived here during the week and will have charge of the operations on the property.

Development work on the Oatman Empire is well under way. This property which is located in the north-west section of the camp takes in 20 claims and is operated by a number of eastern capitalists, headed by John E. Cockrum, the general attorney for the New York Central R. R. company.

Work is being extended on the 500 foot level of the Gold Dust under the management of F. E. Brush. The company is making every effort to explore the ore body with the greatest possible speed. The Gold Dust is one of the oldest properties in the district.

The Oatman United is now installing the new machinery. The hoist and lighting engine has arrived and is being put in place. Charles S. Sprague, president of the company and J. K. Turner consulting engineer are on their way to Oatman from Gold Field.

E. W. Brooks of Los Angeles, the noted mining engineer has just completed a highly favorable report on the Oatman Bell, operated by Lester M. Duil of Los Angeles and associates.
